Short Description:

- 390-1300 cfm
- 18-20psi continuous
- 17” HG continuous
- 340-380 pounds wgt

Additional information

Additional: T1050/T850 Truck Blower

information:

The T850 and T1050 are highly versatile with their ability to unload a variety of products from fine powders to food products to pebbles. With strong features including oil tanks at both ends, wide speed and flow capabilities, large driveshaft and bearings, and up to 20 psi capability, the T850 and T1050 are built tough for long lasting performance.

Quiet
T850s and T1050s are engineered with built-in silencing chambers for noise reduction. Installation is quick, simple and available for vertical or horizontal applications including vacuum loading and pressure discharge as well as passenger and driver side mounting.

Mounting Kits - For All Applications
Installation is quick, simple and available for vertical or horizontal applications including vacuum loading, and pressure discharge as well as passenger and driver side mounting. Pre-cleaner kits, power take-offs, stainless steel silencers, and air-filters are also available.

SHUR-MELT™ Plugs
All T850 & T1050 blowers are specially equipped with our patented SHUR-MELT thermal relief plugs for heat and pressure protection. Upon activation, plugs will relieve 5-6 PSIG with a corresponding 80-100°F discharge temperature drop to protect blowers from damage. Plugs are located on the in-take and discharge side of the blowers.

Filter Silencers
Filter Silencers provide both intake silencing and filtration ensuring clean air reaches the blower. Vacuum loading and pressure discharge silencers are available in steel and stainless steel.

Packaged Units
The T850 & T1050 are also available as packaged units complete with components selected specifically for your application. Electric or engine driven options are available. For more information,

please call 1-800-825-6937 for the distributor nearest you.
