Drop Line at Rear of  
Tank, Air Operated  
Internal Valves, Two  
Hose Tubes on Right  
Side, Premier Pintle Hook  
with Light and Air Hook  
Ups.

INFO: Our refurbishing process varies depending on what each specific truck needs, with quality being our highest priority. Every truck goes through our 21 point Quality Inspection Checklist. We refurbish each truck to ASME and DOT standards. We then go through and completely detail the truck by steam cleaning the engine, the chassis, the tank, the meter box, etc. Next, we send the fuel truck to a third party vendor that performs the annual and five year test on the tank, along with the Department of Transportation (DOT) annual inspection. Customers who purchase our trucks will have the benefit of a full annual and a full five year tank certification (P,I,V,K) along with the full annual DOT certification.
