System, Air Internal
Valves, 2" Drop Line,
Small Aluminum Tool
Box on Left Side, 2 Hose
Tubes on Right Side.

INFO: Our refurbishing
process varies depending
on what each specific
truck needs, with quality

being our highest priority. Every truck goes through our 21 point Quality Inspection Checklist. We refurbish each truck to ASME and DOT standards. We then go through and completely detail the truck by steam cleaning the engine, the chassis, the tank, the meter box, etc. Next, we send the fuel truck to a third party vendor that performs the annual and five year test on the tank, along with the Department of Transportation (DOT) annual inspection. Customers who purchase our trucks will have the benefit of a full annual and a full five year tank certification (P,I,V,K) along with the full annual DOT certification.
