Printer, Electric Hose  
Reel with around 100' of  
1 1/4" Hose & Scully  
Nozzle, Cable Operated  
Internal Valves,  
Aluminum Tool Box on  
Right Side.

INFO: Our refurbishing  
process varies depending  
on what each specific  
truck needs, with quality  
being our highest priority.  
Every truck goes through  
our 21 point Quality  
Inspection Checklist. We  
refurbish each truck to  
ASME and DOT  
standards. We then go  
through and completely  
detail the truck by steam  
cleaning the engine, the  
chassis, the tank, the  
meter box, etc. Next, we

send the fuel truck to a third party vendor that performs the annual and five year test on the tank, along with the Department of Transportation (DOT) annual inspection.

Customers who purchase our trucks will have the benefit of a full annual and a full five year tank certification (P,I,V,K) along with the full annual DOT certification.
