Brakes with Jumper  
Hoses, Cable Operated  
Internal Valves, HotShift  
PTO's.

INFO: Our refurbishing  
process varies depending  
on what each specific  
truck needs, with quality  
being our highest priority.  
Every truck goes through  
our 21 point Quality  
Inspection Checklist. We  
refurbish each truck to  
ASME and DOT  
standards. We then go  
through and completely  
detail the truck by steam

cleaning the engine, the chassis, the tank, the meter box, etc. Next, we send the fuel truck to a third party vendor that performs the annual and five year test on the tank, along with the Department of Transportation (DOT) annual inspection. Customers who purchase our trucks will have the benefit of a full annual and a full five year tank certification (P,I,V,K) along with the full annual DOT certification.
