Recovery, Scully Intelli  
Check 2 Overfill

Protection System, 3"  
Drop Line at Load Heads,  
Air Operated Internal  
Valves, Hose Tubes on  
Right Side.

INFO: Our refurbishing process varies depending on what each specific truck needs, with quality being our highest priority. Every truck goes through our 21 point Quality Inspection Checklist. We refurbish each truck to ASME and DOT standards. We then go through and completely detail the truck by steam cleaning the engine, the chassis, the tank, the meter box, etc. Next, we send the fuel truck to a third party vendor that performs the annual and five year test on the tank, along with the Department of Transportation (DOT) annual inspection. Customers who purchase our trucks will have the benefit of a full annual and a full five year tank certification (P,I,V,K) along with the full annual DOT certification.
