Loading Heads with
Brake Locks, Vapor
Recovery, Scully Intelli
Check 2 Overfill
Protection System, Tool
Box on Left Side, Hose
Tubes on Right & Left
Sides.

INFO: Our refurbishing
process varies depending
on what each specific

truck needs, with quality being our highest priority. Every truck goes through our 21 point Quality Inspection Checklist. We refurbish each truck to ASME and DOT standards. We then go through and completely detail the truck by steam cleaning the engine, the chassis, the tank, the meter box, etc. Next, we send the fuel truck to a third party vendor that performs the annual and five year test on the tank, along with the Department of Transportation (DOT) annual inspection. Customers who purchase our trucks will have the benefit of a full annual and a full five year tank certification (P,I,V,K) along with the full annual DOT certification.
