Jumper Hoses, Cable
Operated Internal Valves,
Barrel Rack with Lift
Gate.

INFO: Our refurbishing
process varies depending
on what each specific
truck needs, with quality
being our highest priority.
Every truck goes through
our 21 point Quality
Inspection Checklist. We
refurbish each truck to
ASME and DOT
standards. We then go
through and completely
detail the truck by steam
cleaning the engine, the
chassis, the tank, the
meter box, etc. Next, we

send the fuel truck to a third party vendor that performs the annual and five year test on the tank, along with the Department of Transportation (DOT) annual inspection.

Customers who purchase our trucks will have the benefit of a full annual and a full five year tank certification (P,I,V,K) along with the full annual DOT certification.
